

## IMPROVING PERFORMANCE MACHINERY IN UKRAINE

**Klimenko O.P.**

The paper discusses the internal and external factors stabilize the economy enterprises farm complex of Ukraine. In particular, studied the problem of the agricultural machinery, the solution of which will improve and increase its efficiency. In modern conditions of market economy formation of a new social-oriented management model can not be solved only on the use of traditional administrative tools. There is an objective need for reform and improvement of methods and tools for managing the national economy. Improved management will determine the formation of a system of national economy management levelobjects and regions. That would strengthen their economic position, leveling the role of individual enterprises in the formation of results of operations, future economic growth and sustainable social development.

However, the problem of the formation of an effective system of management of the industry requires a deepening of the theory and practice of program-oriented planning and management, further improvement of mechanisms: organizations develop targeted programs for monitoring the implementation of targeted programs, information security management system targeted programs.

**Keywords:** efficiency, program-oriented planning, organizational structure, strategy development.
